BRUSHED

- NEOBOND Brushed series provide a stylish facade cladding solution that imitates natural delicacy, which is similar to hairline texture of brushed stainless steel. Brushed panels with it simplicity can create a unique architectural style and add a refined metallic look to any facade.
- NEOBOND Brushed panels are ideal for the projects where immaculate elegance of metallic finish is required along with the versatile and practical application.

-
- Each colour in current colour chart is represented for display purposes only. Please check the actual colour accordance to your project with our sample.
 - Colour differences may occur between panels from different production batches. The entire required amount of material for the project must be ordered as one batch.
 - To avoid differences in gloss and reflection, composite panels have to be installed in the same direction, as indicated by the arrows on the protective film.
 - Product series available as NEOBOND, NEOBOND/FR, NEOBOND/A2 (colour variation may occur between different product types, due to different production processes. It is recommended not to mix different product types, if colour consistency is required).
