Mirror Silver

Mirror Gold

Mirror

- NEOBOND Mirror Series offer panels with high reflective mirror finish in gold and silver colours. The possibilities for creating an exclusive architectural concept with mirror panels are unlimited. Whether they simply serve to highlight a part of facade or to overshadow the whole structure, mirror panels are functional and extremely impressive elements that can elevate any architectural solution to a new level.

-
- Each colour in current colour chart is represented for display purposes only. Please check the actual colour accordance to your project with our sample.
 - Colour differences may occur between panels from different production batches. The entire required amount of material for the project must be ordered as one batch.
 - To avoid differences in gloss and reflection, composite panels have to be installed in the same direction, as indicated by the arrows on the protective film.
 - Product series available as NEOBOND, NEOBOND/FR, NEOBOND/A2 (colour variation may occur between different product types, due to different production processes. It is recommended not to mix different product types, if colour consistency is required).
