WS-87356 Green marble

WOOD&STONE

- NEOBOND Wood & Stone series present an excellent imitation of various types of wood (Oak, Cherry, Alder, etc) and stone (Granite, Marble), providing an authentic patterns and structured impression of a real wood or natural stone.
- NEOBOND wood & stone combines beauty of natural material and outstanding characteristics of aluminium composite panel, allowing to create complex shapes and designs. Wood & Stone series panels are excellent for different types of facade cladding both in impressive large compositions or narrow decorative slats, adding fascination to any architectural design.

-
- Each colour in current colour chart is represented for display purposes only. Please check the actual colour accordance to your project with our sample.
 - Colour differences may occur between panels from different production batches. The entire required amount of material for the project must be ordered as one batch.
 - To avoid differences in gloss and reflection, composite panels have to be installed in the same direction, as indicated by the arrows on the protective film.
 - Product series available as NEOBOND, NEOBOND/FR, NEOBOND/A2 (colour variation may occur between different product types, due to different production processes. It is recommended not to mix different product types, if colour consistency is required).
